BENEFITS

Standard Android Devices

Fanvil SDK for Third-Party Secondary Development make it an ideal choice for organizations looking to provide their users with a versatile, secure, and efficient means of accessing various services and applications.

Android 14

Android 14 is the latest version of Google's mobile operating system, and it comes with a host of new features and improvements that make it an exciting update for users and developers alike.

Qualcomm® Snapdragon™ SM6225

Qualcomm® Snapdragon™ SM6225 with an 8-core architecture @2.8GHz is a powerful and efficient mobile platform that meets all your work and play needs.

Fanvil Android LTE Phone V78/V78C

The V78/V78C is an advanced, multifunctional smart device designed to meet the demands of modern office and multimedia applications. Google-certified, it provides access to the Google Play Store and its vast array of apps, allowing for tailored customization to suit your specific needs. You can easily download essential business apps such as Outlook, Teams, 3CX, and Zoom, equipping you with the tools needed to enhance your business operations. With open interfaces, the V78 allows developers to seamlessly install and integrate proprietary applications. It features a 10.95-inch high-definition display, a powerful processor, and a high-capacity battery, ensuring smooth and efficient performance for video

High-Definition Audio

V78/V78C has excellent audio quality that similar products do not have, built-in multiple smart functions such as echo cancellation and noise shielding, which can automatically remove interfering background noise and other unnecessary sounds.
